

EMERCREAM

OZONE REBALANCING HAND CREAM

BARRIER EFFECT

With Ozonized Oil,
Pre-biotic Complex

An emulsion formulated for the restoration of the skin barrier after hygiene treatments with sanitizing products. It contains a Pre-biotic Complex synergized with a mix of natural Ceramides, for a restorative action of the hydro-lipid film and for the rebalancing of the physiological skin microbiota, altered by alcohol-based treatments. In this way, it optimizes the skin self-protection capability and defense against environmental aggressions. Ozonized Oil Neozone 4000 promotes repair processes and soothes the skin, making it soft and hydrated.

TESTED EFFICACY

Its soothing and re-epithelizing properties (hydro-lipid film restoration) are tested by dermocosmetic laboratories.

NATURAL ORIGIN

Over 98% of the raw materials are of natural origin.

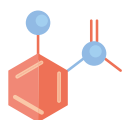

DERMATOLOGICALLY TESTED

Suitable for all skin types and for frequent use. It does not contain chlorine, formaldehyde, parabens.

ACTIVE INGREDIENTS

BIO-MIMETIC ACTIVE INGREDIENTS

Thanks to the presence of biomimetic active naturally present in the skin NMF (Natural Moisturizing Factor), Emercream restructures and rebalances the stressed skin, guaranteeing its physiological barrier effect of protection against external aggressions.

NEOZONE 4000

Neozone 4000 is the ozonized sunflower oil with 4000 mEq/L of added oxygen. In the incorporated percentage it has the function of boosting cellular activity due to the effect of "oxidative stress".

PRE-BIOTIC COMPLEX

The mix of Glycerine, Lactic Acid and natural sugars contributes to the restoration of the correct skin microbiota and its dynamism, that is, the ability to vary adapting to environmental conditions and requests. By keeping the microbiota well balanced, it optimizes the natural defense capability of the skin against external aggressions (barrier function).

CERAMIDES

Ceramides reinforce the action of the Pre-biotic Complex as they represent the bearing structure of the epidermal barrier and guarantee its functionality, preventing the entry of harmful substances into the innermost layers of the skin and avoiding excess transepidermal water loss (TEWL).

THE PRODUCT

Restorative, balancing emulsion after sanitizing treatments.

INDICATIONS

Product for external use, to rebalance the hydro-lipid film and rebalance the skin microbiota.

HOW TO USE

After cleansing and hand hygiene, massage the cream until completely absorbed. Use freely several times a day, as needed.

WARNINGS

External use.

In case of contact with eyes, rinse thoroughly with water. Keep out of reach of children.

Packaging
Tube 100 ml
